

Slow-grown timber from northern Sweden

Norra Timber is renowned for delivering high quality, slow-grown timber sourced from private forest owners in northern Sweden.

We operate three modern sawmills and one utility pole factory, as well as processing units consisting of two planing mills, one painting factory and a pressure treatment facility.

Our sawmills produce a wide range of exceptional timber products from premium spruce and pine, and our commitment to investing in cutting-edge technology combined with the skill of our employees makes us competitive today and far into the future.

Pre-sawn & custom dimensions

Norra Timber's range of redwood and whitewood sawn products are made from pine and spruce grown slowly in the magnificent forests of northern Sweden.

Our high-quality products are available in a wide range of lengths and dimensions. With short lead times, customized logistics, reliable deliveries and modern IT solutions, we'll always find the best solution for your specific needs.

Sustainable forestry

To ensure our forests will thrive for generations to come we always strive to create as little waste as possible by making the absolute most of the raw materials from each and every felled tree. We select trees at an early stage that will eventually become our products, as well as identify those we will leave standing in order to encourage diversity and provide food for the forest's wildlife. When trees are felled they are always cut with the aim of minimizing waste.
